Notas	
Carga en libras sobre los espárragos cuando el torque arriba señalado sea aplicado	
La cuerda del perno la tuerca y la superficie deben estar lubricados antes de apriete	
Es muy recomendado que el equipo de apriete hidráulico sea usado en pernos de 1 1/8" hacia arriba	
Controlar el apriete del perno es muy recomendado para minimizar el riesgo de fugas en el ensamblado	
En el ensamblado lo que fuga es la brida y no el empaque.
